

## **Senior Finance Business Partner**

### **Company Overview**

Headquartered in Grange Co. Sligo, SF Engineering is an established manufacturer of turnkey production systems for the consumer foods industry. Operating from locations in Sligo and Cambridgeshire, UK, the company is undergoing rapid expansion to fulfil demand for its highly engineered solutions which combine leading-edge technologies with advanced design methodologies and customer service.

SF Engineering employs 120 people and has customers in over 60 countries, worldwide. The company has a strong track record of growth and the business has been built upon high levels of customer satisfaction, supported by an ambitious sales strategy. Further expansion of the business will be driven by a combination of growth within existing accounts, expansion to new accounts, new geographies, new products and acquisitions.

### **Role Overview**

To support its continued success and ambitious expansion plans, SF is seeking to appoint a Senior Finance Business Partner. This role reports to the Finance Director and is based at our headquarters in Grange, Co. Sligo. Working with all functions within the company, the Senior Finance Business Partner will co-ordinate and drive the budgeting/forecasting process, lead the systems upgrade and assist the Finance Director with integrating acquisitions.

### **The Person**

This role requires an experienced accountant who understands manufacturing systems and budgetary processes. The appointed candidate will have a significant role in preparing for and executing the financial and systems portion of the company's expansion programme. As such, they require the ability to work with all levels of management and communicate effectively.

### **Responsibilities:**

- Lead and deliver the budgeting and forecasting process for all parts of the organization
- Lead the project to lean out the business and finance systems including upgrading to new or updated ERP software
- Assist with integration of new acquisitions to the same platform
- Assisting in the improvement and development of internal systems and controls.
- Preparation of other financial reports as required by senior management

**Skills, Knowledge & Experience:**

- Qualified Accountant
- 5 to 10 years' experience in a fast-paced industry environment
- Excellent knowledge of business and accounting systems ideally based on having implemented ERP system previously
- Ability to analyse problems, develop and implement solutions to generate immediate results.
- Excellent interpersonal and communication skills (written & verbal) – ability to develop strong working relationships within the business.
- Positive and flexible attitude with the aptitude to take ownership of work as required and see it through to completion.

**Salary & Benefits:**

- Competitive based on the seniority of the role.
